## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Group I. Claims 1-22, 29-31 and 38-43, drawn to router, plunge base locking mechanism combination, classified in class 144, subclass 136.95.
- Groups II. Claims 23-28, drawn to router, depth control, indicator combination, classified in class 409, subclass 182.
- Group III. Claims 32-37, 44 and 45, drawn to router fixed base motor assembly combination, classified in class 144, subclass 154.5.
- Group IV. Claims 46 and 47, drawn to subcombination router motor assembly, classified in class 409, subclass 181.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I-III are related as different combinations. In the instant case, the combinations as claimed do not require the particulars of either of the other combinations for their practice, i.e. all of the combinations have separate utility and are operable independent of each other, and accordingly the inventions of Groups I-III are separable and distinct.

Inventions Groups III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as

Art Unit: 3725

evidence by claim 32. The subcombination has separate utility such as use with any router and is not limited to the invention of Group III for its operation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, their recognized divergent subject matter and because the search requirements for Groups I-IV are not the same, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
